

You're taking home an **opioid**.

TAKE HOME NALOXONE, TOO.

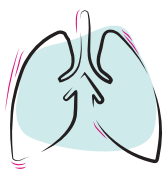

Naloxone reverses an overdose.

It is safe and easy to use, and it carries no risk of misuse.

ACCIDENTAL **OVERDOSE** CAN HAPPEN TO ANYONE.

Call 9-1-1 if you think someone
is having an overdose.

Know the signs of an opioid overdose:

Slow or irregular breathing

**Unresponsive to voice or
touch or passed out**

**Blue or purple lips or
fingernails**

Pinpoint-sized pupils

Pale, clammy skin

Slow or irregular heartbeat
